Art Unit: 3671

**DETAILED ACTION** 

Claim Objections

Claim 4 is objected to because of the following informalities: In claim 4, line 1, it appears that "any one of claims" should be deleted and –claim—be inserted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, line 1, the phrase "or the like" renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim unascertainable. See MPEP § 2173.05(d).

Art Unit: 3671

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

Claims 1-5 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by

Nelson '165. Nelson discloses a device for removing weeds (figures 1-3) comprising an

elongated shaft (generally 12), a ground support 42 pivoted (as defined along axis 38 as

seen in figure 1) to a first end of the shaft and at least two blades 22 including gripping

ends forming an extension to the shaft. Also, Nelson discloses the shaft, ground

support and blades being functionally connected together in a manner that allows

turning the shaft and the ground support with respect to one another thus moving the

blades towards one another gripping for a plant (as seen in figure 2, plain and phantom

views).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

Art Unit: 3671

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6, 7 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson et al. 165 in view of Pakosh 465. Nelson discloses the claims device substantially as discussed above but fails to show the use of three or an "array" of blades used in a plant removing device. However, Pakosh discloses that it is well know to provide such an "array" of blades (as seen in figures 1 and 2) in concert with a plant removing device as well as actuate those blades as necessary to extract plants/weeds. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the device of Nelson with the teachings of Pakosh in order to provide a tool having greater gripping power and thus being more operational effective.

## **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert E Pezzuto whose telephone number is (703) 308-1012. The examiner can normally be reached on 7:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B Will can be reached on (703) 308-3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
